To Whom It May Concern

Re: Mackenzie and Ebert Ltd

Mackenzie and Ebert were short listed with 3 other Golf Course architects including IMG for the new Championship Golf Course at Heythrop Park Resort.

We chose Mackenzie and Ebert principally due to the passion shown by Tom Mackenzie for the project and we were not disappointed.

Heythrop Park is an 18th Century English Estate, set in 441 acres of beautiful parkland. The estate is precious due to its heritage and any development on Heythrop is strictly controlled by English Heritage. It took over 5 years to obtain planning permission for the golf course and a comprehensive re-instatement plan had to be agreed.

Tom did an excellent job from design to tender through construction and now on opening with defects, we were particularly impressed with Tom's flexibility during construction where several amendments were required, these were entered into without issue. Handling English Heritage and its consultants was also a challenge that Tom handled extremely well.

The course at Heythrop Park is now fully open with only compliments received so far on the quality. This has been further confirmed by the European Tour confirming that a Tour event could be held on the course only one year after opening.

I would recommend Mackenzie and Ebert for any golf course design assignment and I would have no hesitation in working with them again in the future.

Yours,

John Angus
Operations Director
Heythrop Park Resort
