240

Drench - 200L

7,00 €

Price / L

Total Price

1.680,00 €

Notes:

Start date can vary, ideally apply when consistant growth has commenced

Application schedule designed to provide a preventative programme to prevent the build up of water repellent materials in the rootzone, aid penetration of water through the rootzone - providing a firm playing surface, ensure optimum use of applied irrigation and to prevent turfgrass stress caused by localized soil water repellency
