

SUMMARY REPORT

Scenario: Galicia has received lots of precipitation (> 400 mm) during last two months.

GREENS

- Good firmness.
- Low density.
- Grain.

Recommendations:

- ✓ Verticutting + Hollow coring aeration + sand topdressing.
- ✓ After recovering, light grooming (-1 to -2 mm) biweekly.
- ✓ Light sand topdressing 15 days before tournament week.
- ✓ Maintain a well balanced fertilizer program avoiding flushes in growth and leaning off of the turf.
- ✓ Spoon feeding with: liquid nitrogen and iron + chlorothalonil @ 3 l/Ha + Propiconazole @ 1,5 l/Ha.
- ✓ Check blade sharpness and set up.
- ✓ Height of cut 3.5 mm.
- ✓ Target tournament green speed 9-9.5 ft.

PRACTICE GREENS

Must be prepared the exact same as greens on the course. There is not a chipping green and putting green has big dimension. Thus, some area of the putting green could be used as a chipping green.

GREEN COLLARS AND APPROACHES

- Low density.
- Compacted.

Same recommendations as greens. Height of cut 12-14 mm.

TEES

- Level and firm.
- Good grass coverage.
- A good stand is guaranteed.

REAL FEDERACIÓN ESPAÑOLA DE GOLF

Recommendations:

- ✓ Hollow coring aeration + overseeding with perennial rye + sand topdressing.
- ✓ Maintain a well balanced fertilizer program avoiding flushes in growth and leaning off of the turf.
- ✓ Check blade sharpness and set up.
- ✓ Will be saved for 10 days before the event.
- ✓ Height of cut 12-14 mm.

FAIRWAYS AND PLAYABLE ROUGH

- Good color and density.
- Waterlogged.

Recommendations:

- ✓ Slicing to improve infiltration.
- ✓ Maintain a well balanced fertilizer program avoiding flushes in growth and leaning off of the turf.
- ✓ Check blade sharpness and set up.
- ✓ Increase mowing frequency.
- ✓ Fairways height of cut 13-15 mm.
- ✓ Playable rough height of cut 30-40 mm.

BUNKERS

Bunkers are our main concern.

- Few sand with very big particle size (like gravel).
- Sand contaminated with soil.
- No drainage.
- Stones contamination.
- No budget to purchase new sand.

Recommendations:

- ✓ Continue screening sand on bunkers around greens and those that come into play on fairways.
- ✓ Raking bunkers to decompacted existing sand.
- ✓ Removing stones.
- ✓ Clipping and edging.
- ✓ Removing weeds.
